

AI-Empowered SAFe® Implementing SAFe

Lead enterprise transformation and amplify coaching impact with AI.

To lead organizational change at scale, change agents must master the core principles of the SAFe Framework while leveraging the transformative potential of AI. This course equips you with the verified skills to coach, teach, and guide successful transformations as a SAFe Practice Consultant (SPC). You will learn to identify value streams, launch Agile Release Trains, and apply AI-driven insights to accelerate value delivery. By combining authoritative transformation leadership with specific AI prompting techniques, you will amplify your effectiveness and drive lasting impact across the entire enterprise.

What You'll Learn

Guide Enterprise Change

Plan and guide a SAFe transformation through coaching, training, and hands-on leadership.

Advance Product Delivery

Practice agile product management principles to build products and advance delivery.

Optimize Organizational Flow

Identify value streams and launch Agile Release Trains to accelerate value delivery.

Apply Practical, Responsible AI Prompting Techniques

Integrate responsible AI tools to streamline workflows and solve complex problems faster.

Topics Covered

- Adapting and Thriving with SAFe
- Building a Foundation with Mindset, Values and Principles
- Team and Technical Agility
- Agile Product Delivery
- Lean Portfolio Management
- Leading the Change
- Reaching the SAFe Tipping Point
- Designing the Implementation
- Launching the Agile Release Train
- Coaching ART Execution
